**E. SESSION SUMMARY**

In route to the target many images came to mind. The territory is sparse in a town which has people, roads, and spacious countryside. Rolling hills or mountains are in the surrounding area and a shore with boats. Structures on or by water. There are many houses with land. For example, one structure of interest appeared to be a white house with a front porch. This structure has trees and a fenced in yard with fields. There may be some farming in this community.

There are animals in the target area to include a dog, cat, horses and a red barn. A large and somewhat tacky sign off the road displays either the name of a store, or where people come to trade with money. A race track or a form of racing may be in the area.

An object which moves around in a circular fashion with propeller shaped wings or tips is active at the target.
